

W&J
**GREEN BUILDING
AND DESIGN**
Summer Institute

W&J | **CENTER FOR ENERGY
POLICY & MANAGEMENT**

Welcome **TO W&J**

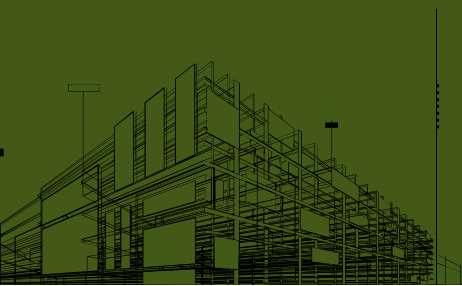

The Center for Energy Policy and Management (CEPM) is a part of Washington & Jefferson College (W&J) in Washington, PA. Formed in 2012, the Center specializes in helping students, faculty, staff, non-profit leaders, and public officials in the region learn about important issues related to energy and sustainability.

This summer, the Center invites local high school students to take part in its first-ever Green Building and Design Summer Institute. Supported by the FirstEnergy and Claude Worthington Benedum Foundations, the program will introduce students to the basics of architecture, buildings, construction, design, and energy.

Through hands-on activities, field trips, guest speakers, and one-on-one connections with W&J students and professors, students will have the opportunity to learn about current and emerging careers related to green buildings and design in our region.

The program will run June 12-23, 2023, Monday through Friday. The program begins at 9 am and concludes at 2 pm each day on W&J's campus. There is no cost to students or families. Lunch will be provided to students for free. Families are responsible for transportation to and from the program.

About

THE PROGRAM

In the United States, the need for workers with knowledge of green buildings, design, and energy efficiency is growing. In fact, we expect demand for workers with this knowledge to grow by 105% in the next decade! Unfortunately, not many students have the opportunity to learn about these important jobs in school. That's why we developed this summer program. Together, we will learn about these issues and complete a project that puts your skills to work.

Throughout the program, you will take field trips, talk to professionals, and complete hands-on activities that get you out of the classroom and into the real world.

Any student with an interest in current issues, the environment, sustainability, or science is encouraged to participate. Whether you are college-bound or career-focused, we will talk about the skills and knowledge you need to be successful in the future.

One-On-One Connections

Students will have the opportunity to work one-on-one with faculty and students at W&J to learn important skills for school, college, and work later in life. This program is design to help students succeed in a variety of settings.

How to **REGISTER**

Have questions?

Contact the Center for Energy Policy and Management's GBDSI Coordinator, Mr. Michael DaVia, at 412-400-7860

Want to learn more?

Lear more about the Center and the summer program by visiting our website, www.wjenergy.org/summer

Ready to register?

Students will need to complete a short application to join the program. Details and application can be found online www.wjenergy.org/summer
